

## Ozark Christian College

### OUR LEARNING GOAL

Graduates of Ozark Christian College will be grounded in Scripture, growing in Christlikeness, practicing cultural discernment, and vocationally prepared for Christian service.

### UNDERGRADUATE STUDIES: Learning Philosophies and Outcomes (all programs)

The **general education** curriculum contributes to this goal by equipping students with the foundational skills, knowledge, and disposition necessary to be productive, well-informed, and ethical members of society. More specifically, our general education curriculum both (a) prepares students for the more specialized learning of our biblical and professional curriculum, and (b) provides the skills necessary to apply this learning to the settings and problems they will engage in the world we are sending them out to serve. To this end, general education will prepare students to...

- GE 1: Communicate effectively in written and oral forms.
- GE 2: Think critically from a Christian worldview.
- GE 3: Identify informational needs for lifelong learning.
- GE 4: Work collaboratively to accomplish shared goals.
- GE 5: Appreciate and responsibly engage the physical world and diverse cultures, both past and present.
- GE 6: Integrate learning and experiences to new settings and complex problems.
- GE 7: Solve quantitative problems from everyday life situations.

The **biblical education** curriculum contributes to this goal by equipping students to know and affirm the content of the Bible and interpret it to discern the author's intended meaning. It will also contribute to the spiritual formation of students so that they can effectively serve in the church and the world. This biblical foundation will guide students in forming a Christian worldview and philosophy of ministry to be developed in the general and professional curricula. To this end, biblical education will prepare students to...

- BE 1: Know the historical and theological content of the Bible.
- BE 2: Employ historical-grammatical principles for biblical interpretation.
- BE 3: Affirm one's personal belief in the lordship of Jesus and in the authority of the Scriptures.
- BE 4: Grow in spiritual formation and develop plans for continued growth.

The **professional education** curriculum contributes to this goal by preparing students with practical instruction for effective ministry inside the church vocationally or in the larger marketplace. Through classroom instruction and field experience, as well as an emphasis on Christian service, students will be equipped with a framework that is designed to shape their motives, strategies, applications and practices of various ministry skills. To this end, professional education will prepare students to:

- PE 1: Integrate a Christian service philosophy, biblical theology, cultural context, and call to ministry (vocation).
- PE 2: Demonstrate the ability to engage the culture in which Christian service takes place.
- PE 3: Execute the principles of biblical discipleship within their Christian service context.
